

Medical Report

SUMMARY

****Patient Details:****

- Patient Name: Mrs. Sumathi B
- Patient ID: 0100062370
- Joining Date (Reg.Date & Time): 22/04/2024, 08:30 AM

****Test Report:****

- Ultrasound Whole Abdomen:

- Technique: Real-time B-mode ultrasound performed using a curvilinear transducer.
- Findings:
 - o Liver: Normal in size (14.6 cm) with diffuse increase in echotexture. No visible lesions. Intrahepatic biliary radicles, portal vein, and hepatic veins appear normal.
 - o Gall Bladder: Well distended with normal contour and wall thickness. No visible calculi. Common bile duct appears normal.
 - o Pancreas: Normal size and echotexture. No duct ectasia or calculi.
 - o Spleen: Normal in size and echotexture. Splenic vein appears normal.
 - o Kidneys:
 - Right Kidney: 10.8 x 4.6 cm, normal in size. Normal cortical echoes and corticomedullary differentiation. Pelvicalyceal system not dilated. No calculi.

****Impression:****

Medical Report

The ultrasound examination of the abdomen reveals no significant abnormalities in the liver, gallbladder, pancreas, or spleen. The right kidney appears normal in size with normal cortical echoes and corticomedullary differentiation. No calculi or pelvicalyceal dilatation is noted.

****Medical History:****
